

Waikato Speedsampler

Make herd testing and milk recording easier and faster than ever before.

Waikato Speedsampler

3 steps is all it takes to operate a Waikato Speedsampler

- Replace the vial* - simply slip another vial onto the sampler head
- Push the button - to agitate the contents of the flask depress the button on the sampler head
- Cover the hole - to take a sample momentarily cover the hole at the side of the sampler head with your finger

That's it the Waikato Speedsampler will automatically re-set itself ready for the next cow. You will benefit every time you use a Waikato Speedsampler, saving valuable time in the process.

Turn herd testing into a fast and efficient process.
